

U.S. Serial No. 10/601,171

Filing Date: June 23, 2003

PROPOSED CLAIM AMENDMENT
DRAFT
FOR DISCUSSION PURPOSES

61. (Currently Amended) A composition comprising an amount of an isolated monoclonal antibody effective to ~~prevent~~ prophylactically or therapeutically treat staphylococcal infection in neonates and a pharmaceutically acceptable carrier, wherein the antibody specifically binds to poly-glycerol phosphate of Lipoteichoic acid (LTA) of *Staphylococcus* ~~Gram positive bacteria~~ and is of the IgG isotype, wherein the antibody binds to and enhances opsonization of multiple serotypes of *Staphylococcus epidermidis*, coagulase negative staphylococci, *Staphylococcus aureus* and *Streptococcus mutans* by phagocytic cells with or without complement as compared to an appropriate control in an in vitro opsonization assay.
